

Glen de Vries
President
Medidata Solutions

Glen is the president and co-founder of Medidata, and the original architect of the Medidata Rave[®] platform. With his deep expertise in medical research and understanding of technology's role in streamlining complex processes, Glen has been driving Medidata's vision since the company's inception: Delivering cloud-based solutions to transform the life science industry's approach to bringing new treatments to market.

Glen received his BS in molecular biology and genetics from Carnegie Mellon University, worked as a research scientist at the Columbia Presbyterian Medical Center and studied computer science at New York University's Courant Institute of Mathematics. He is the holder of numerous patents for clinical trial innovations, and is a member of the board of the [Young Scientist Foundation](#) and chairman of the board of [Dancing Classrooms](#).
